

Cyber Insurance

Centor offers robust insurance solutions which will protect your business from a data breach.

Business-owners have only recently come to realise the importance of having Cyber Liability insurance. As a result, more insurers than ever before offer these policies, and cover is becoming cheaper and more comprehensive.

Cyber Liability protects your business in the event of a data breach or attack by a hacker. This insurance can provide cover on both a first party and third party basis. Third party insurance will typically provide coverage for legal liability for claims made against you as a direct result of a cyber-attack while first party coverage will cover the costs of your own business in responding to a cyber event and any resultant loss of profit.

We offer policies which include cover for:

- Reputational PR
- Third party credit monitoring
- Cyber Business interruption
- Losses attributed to your IT service provider

In a world of social media, it is important that Crisis Response is managed properly, so we will only recommend Cyber cover which includes a dedicated incident response team on hand 24/7. This means they can help manage everything from notifying potentially affected customers to monitoring social media following the incident.

We have access to a range of insurers, so no matter what sector you work in, we can ensure you have the right cyber liability cover in place. And if the worst should happen, our in-house claims team will work to get your claim settled as quickly as possible, to get your business back up and running faster.

That's the Centor Difference.

Call James Groves on 0207 330 8707 to discuss your Cyber Insurance needs.
